                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Sequence 21, Application US/08470837

Patent No. 2500811

GENERAL INFORMATION:
APPLICANT: Nimni, Marcel E.
APPLICANT: Tuan, Tai-Lan
APPLICANT: Cheung, David T.
TITLE OF INVENTION: Transforming Growth Factor B Fusion
TITLE OF INVENTION: and
TITLE OF INVENTION: Their Use in Wound Healing
NUMBER OF SEQUENCES: 34
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Query Match

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             ·.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Sequence 9, Application US/09280030A
Patent No. 6506595
GENERAL INFORMATION:
APPLICANT: Sato, Selji
APPLICANT: Atdo, Toshiyuki
APPLICANT: Kudo, Toshiyuki
TITLE OF INVENTION: PREPARING USEFUL POLYPEPTIDES THROUGH EXPRESSION OF THE TITLE OF INVENTION: DNAS
TITLE OF THE REFERENCE: 382.1026
CURRENT APPLICATION NUMBER: US/09/280,030A
CURRENT FILING DATE: 1999-03-26
EARLIER APPLICATION NUMBER: JP10-87339/1998
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Gaps

TYPE: nucleic acid
STRANDEDUSS: double stranded
TOPOLOGY: linear
MOLECULE TYPE: genomic DNA
DESCRIPTION: 16s TRNA gene from Alcaligenes
DESCRIPTION: accalis (Accession # M22508, M22467)
DESCRIPTION: nucleotides 444 to 456
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        271 :FROM 1 TO 13

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             à
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   P
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         Sequence 2378, Application US/09371772B

Patent No. 6566127

GENERAL INFORMATION:

APPLICANT: Ribozyme Pharmaceuticals, Inc.

APPLICANT: Pavco, Pam

APPLICANT: Bacobed, Jaim

APPLICANT: Escobed, Jaim

APPLICANT: Escobed, Jaim

APPLICANT: Brokeded, Jaim

APPLICANT: Action of Vascular Endothelial Growth Factor Receptor

TILE OF INVENTION: Levels of Vascular Endothelial Growth Factor Receptor

FILE REFERENCE: Manhen00, Pam

TILE OF INVENTION: Levels of Vascular Endothelial Growth Factor Receptor

FILE REFERENCE: Manhen00, Pam

CURRENT APPLICATION NUMBER: US 60/005,974

PRIOR FILING DATE: 1999-08-10

PRIOR APPLICATION NUMBER: US 60/005,974

PRIOR PILING DATE: 1995-10-26

PRIOR FILING DATE: 1995-10-26

NUMBER OF SEQ ID NOS: 14225

SOFFWARE: PatentIn version 3.0
                                                                                                                                                                                                                          APPLICANT: Given, fem.

GENERAL INFORMATION:

APPLICANT: Ribozyme Pharmaceuticals, Inc.

APPLICANT: Rabozyme Pharmaceuticals, Inc.

APPLICANT: Pavco, Pam

APPLICANT: Makeyagen, Jim

APPLICANT: Escobedo, Jaime

TITLE OF INVENTION: Method and Reagent for the Treatment of Diseases or Conditions Re

TITLE OF INVENTION: Levels of Vascular Endothelial Growth Factor Receptor

TITLE OF INVENTION NUMBER: US 60/005,974

PRIOR APPLICATION NUMBER: US 60/005,974

PRIOR APPLICATION NUMBER: US 60/005,974

PRIOR PELING DATE: 1995-10-26

PRIOR PELING DATE: 1995-01-08

NUMBER OF SEQ ID NOS: 14225

SOFTWARE PATENTION OF SEQ ID NOS: 14225

SEQ ID NO 5479

LENGTH: 17
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Gaps

Patent No. 5837469

GENERAL INFORMATION:
GENERAL INFORMATION:
TITLE OF INVENTION: Amplification and Detection of Chlamydia Trachomatis
TITLE OF INVENTION: Amplification and Detection of Chlamydia Trachomatis
TITLE OF INVENTION: Mucleic Acid
NUMBER OF SEQUENCES: 14
CORRESPONDENCE ADDRESS:
ADDRESSEE: Richard J. Rodrick - Becton, Dickinson and
